## Yale-New Haven Hospital Bone Marrow Transplant

### Patient Population

Operating as an adjunct to the 36-bed Medical Oncology Unit, the 8-bed Allogeneic Bone Marrow Transplant Unit (located on 8 West Pavilion) provides care for patients undergoing matched related and matched unrelated transplants. Together, these units care for bone marrow transplant patients throughout the continuum — including outpatient follow-up care for a minimum of the first 100 days. These units are also involved in leading edge research on cancer care and treatments, in collaboration with the Yale School of Medicine and Yale Cancer Center.

### Nursing Environment

Nurses on 9WP practice in an environment with on-site access to Advanced Practice Oncology Certified Clinical Nurse Specialists (one of whom specializes in palliative care), a Board Certified Oncology Pharmacist, Care Coordinators, Social Workers, a Dietician and Chaplin Services. Patient assignments are 1:4 (RN to patient) on the day, evening and night shifts. Depending on the workload or patient's acuity, these ratios may change.

Our nursing staff assess patients' physiological and emotional status, administer prescribed treatments, intervene in emergent/urgent situations, provide physical care, teach patients/families, and collaborate with other health professionals in planning and implementing developmentally appropriate cancer care. Emphasis is placed on evidence-based practice.

### A Commitment to Ongoing Learning

RN staff on 8WP contribute to the work of the Oncology Nursing Council, as well as the department-wide Striving for Excellence initiative. In addition, staff nurses provide leadership for several mandatory competencies — including the hospital-wide pain charter and pressure ulcer program. Under the direction of the CNS, eligible staff participate in a staff-driven study program to prepare for national certification in oncology nursing. We also offer:

- **Internet access**
- **Educational Sessions**
- **Patient care conferences**
- **Interdisciplinary and palliative care rounds**
- **Introduction to clinical trials**
- **Center for Professional Practice (nursing education) programs**

### Oncology Nursing Council

RN staff are invited to participate in the Oncology Nursing Council, which was created to continue the process of advancing oncology nursing practice at YNHH. The goals of the council include:

- **Increase nurses' access to oncology nursing expertise**
- **Create educational forums for oncology nurses (including an annual regional conference)**
- **Promote national certification in oncology nursing**
- **Assist in the hospital's recruitment and retention of oncology nurses**
- **Develop evidence-based oncology care protocols/standards**
